- | | | |
|--------------|-----------|------------|
| 2) Jiancheng | 3) Julia | 4) Rappel |
| 5) Miko | 6) Ettore | 7) Triston |
| 8) Meron | 9) Thanh | 10) Andrew |
| 11) Duc | | |

ADRs: Architectural Decision Records

We need to keep track of our Project Decisions!

Minimum at least 3 by the end of the course, no upper limit, so I propose we try to do at least 10 to guarantee the points

Project Pitch (Do Less!)

Need to turn in: a Presentation of no more than 16 Slides **OR** a PDF of no more than 8 Pages, must include a Wireframe (done) and a User Flow Diagram (not done)

Project Scope: What should our project be required to do?

Risks: What do we expect to take up the most time / unlikely to work?

Rabbit Holes: What are we missing in our Brainstorming Miro Chart?

Here are some other categories that we should consider for the Pitch:

Project Requirements:

- ?
- ?
- ?

Target Users:

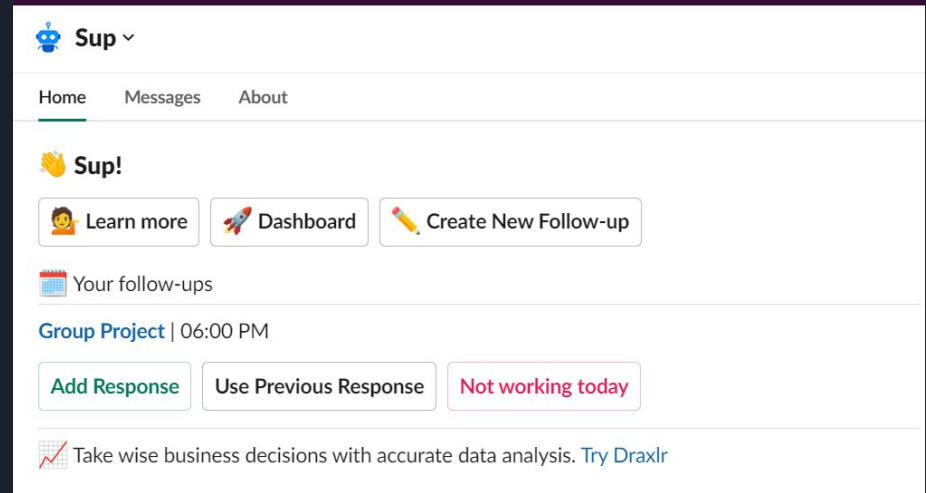

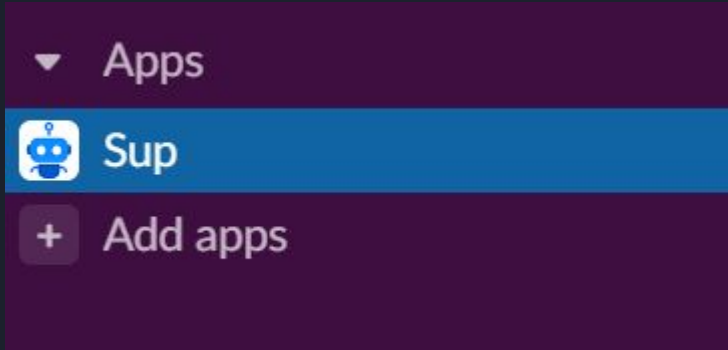

- ?
- ?
- ?

Project Timeline:

- By week 7...
- By week 8...
- By week 9... etc.

Reminder about Daily Standup-Bot

Not everyone is filling out the standups, at least mark if you're not working on the slack page, so when we generate a report we can all get counted for when they grade it.

Planning Ahead

We will begin working on the project next week!

We should consider who will do what before we start working so we are all on the same page.

Team Selection:

||| **HTML** Team ||| **CSS** Team ||| **Javascript** Team |||

Choose which language of web-development you enjoy the most, so when we assign people to develop features of the website it's more personalized.

MEETING END!

That's all Folks!
